My name is I Made Indra Mahaarta, usually called Indra. Currently, I am a student in the Department of Computer Science, Faculty of Computer Science, University of Indonesia. As a computer science student, I have an interest in backend development. During college, I've tried several times to create some web projects related to the backend. One of my favorite projects I've ever made is PiggySaver. PiggySaver is a web application that connects several e-wallets and our bank accounts in a dashboard. By using this application, we can track the total funds we have and the entire list of transactions we do in a month. In the manufacturing process, I worked to connect the API from Brick (a financial fire service provider) to the PiggySaver application service so that later transaction data could be processed and displayed in our dashboard. I hope I can get the opportunity to be able to develop my skills in this backend field. I also believe that with my intention and effort, I can grow to be better.

EDUCATION

Bachelor of Computer Science
University of Indoensia
08/2020 - Present   *Depok, Jawa Barat*

High School Degree
SMAN 2 Amapura
07/2016 - 05/2019   *Amlapura, Bali*

WORK EXPERIENCE

Teaching Assistant of Discreate Mathematics 2
Fakultas Ilmu Komputer
01/2022 - 06/2022   *Depok*

Achievements/Tasks
- Complete tutorial activities once a week
- Make tutorial questions and homework for students
- Check and recap student homework

Teaching Assitant of introduction to Digital System
Fakultas Ilmu Komputer
08/2021 - 12/2021   *Depok*

Achievements/Tasks
- Fill in tutorial or lab activities once a week
- Make tutorial, lab, or homework questions for students
- Check and recap student homework and labs

SKILLS

`Spring Boot` `Django` `Java` `Pyhton`

`HTML` `CSS` `PostgreSQL`
